## Weekly Coal Production

Production for Week Ended: September 5, 1987

## Highlights

U.S. coal production in the week ended September 5, 1987, as estimated by the Energy Information Administration, totaled 19.2 million short tons (bituminous coal and lignite, nearly 19.2 million short tons; Pennsylvania anthracite, .07 million short tons). This was the same as production in the previous week, and was 26.5 percent higher than production in the corresponding week of 1986.

Cumulative U.S. coal production from January through September 5, 1987, was estimated at 60 million short tons, 0.3 percent below the 61 million short tons produced in the comparate period in 1986.

The methodology used to make weekly estima of coal production was published in the Week Coal Production (DOE/EIA-0218(86/35)), releas for publication on September 8, 1986.
